

Adrian Salvador Ekomo

Data & AI Engineer — Data Platforms · Production ML · BI Systems
Tunis, Tunisia • Adriansalvadorekomo.mesiobono@esprit.tn • [adrian-salvador-ekomo-mesi-obono-5990b8182](#) • [adriansalvadorekomo](#)

Professional Summary

Data & AI Engineer building end-to-end data platforms and production ML systems. Experienced in designing data warehouses, deploying machine learning models with automated MLOps, and building real-time observability that drives business decisions.

Education

Esprit School of Engineering — Sept 2022 – June 2027, Engineering (PABI — Business Intelligence) in Computer Science
– Tunis, Tunisia

- Specialized in Data Engineering, Business Intelligence, and Machine Learning

Projects

EventZilla BI

Jan 2026 – May 2026

End-to-end event management BI platform with a star-schema **Data Warehouse**, 10 production ML models, AI chatbot, full observability, and containerized microservice deployment.

- Designed a star-schema data warehouse with **Airflow**-orchestrated ETL pipelines, centralizing event, reservation, and marketing data for a unified BI platform serving cross-functional stakeholders
- Deployed 10 production ML models for pricing, demand forecasting, and anomaly detection with automated **MLflow** MLOps, and built a role-based analytics dashboard handling 80% of analytical queries via natural-language-to-**SQL**
- Implemented full-stack observability with real-time monitoring dashboards and automated ML retraining pipelines on a containerized 11-microservice architecture with production-grade deployment

GabèsEye

Mar 2026 – Mar 2026

AI-powered environmental monitoring platform for Gabès, Tunisia — satellite segmentation, time-series forecasting, air quality prediction, and multilingual AI chatbot — deployed at a national innovation hackathon.

- Trained satellite segmentation models on multispectral imagery to classify soil contamination and detect water turbidity for environmental monitoring
- Developed time-series and classification models for forecasting contamination trends and real-time air quality prediction
- Built a real-time API dashboard and multilingual AI assistant with speech support for environmental data access

Smart-ERP

Apr 2026 – present

DataOps-driven ERP system with automated data pipelines, ML models, and RAG-based AI assistant. In progress.

- Architecting an ERP with automated **dbt** transformations, ML models for sales forecasting and churn prediction tracked in **MLflow**, and a RAG-based AI assistant for natural-language ERP queries over **PostgreSQL**

Powers HR Analytics

Nov 2025 – Dec 2025

Snowflake-schema **Data Warehouse** and **Power BI** solution for HR employee analytics.

- Enabled self-service workforce analytics by designing a snowflake-schema data warehouse and building ETL pipelines with interactive **Power BI** dashboards for HR stakeholders

Skills

Data Engineering & BI: Python, SQL, PostgreSQL, Talend, Airbyte, **dbt**, **Airflow**, ETL/ELT, Data Warehousing, **Power BI**, Prometheus, Grafana

ML, Deep Learning & AI: Scikit-learn, **PyTorch**, **MLflow**, RAG, pgvector, NLP-to-**SQL**, Time-Series Forecasting, Clustering, Anomaly Detection, Computer Vision

Backend, Frontend & DevOps: **FastAPI**, **REST APIs**, WebSockets, **Docker**, Linux, n8n, Cloud Deployment

Languages: Spanish (Native), English (B2), French (B2), German (A1)
